(54) ON-LINE INTERACTIVE SERVICE METHOD AND SYSTEM

(57)Abstract:

PURPOSE: To utilize the high value added service for which a service user's own privacy data is required by the service user without disclosing the privacy data to a service provider side.

CONSTITUTION: In the system connecting a server and a client by a communication network, the client inputs service identification data, transmits the identification data to the server, receives a service execution program from the server, inputs privacy data to be client control data from an input device, transmits a server control data request to the server and receives request data from the server. A irreversible processing is performed for input data by a program and received data, the processing result is delivered to a server specialist and the advice is taken. An output result evaluation is inputted with reference to the advice, the steps on and after the input of the data request are repeated till the evaluation becomes satisfactory and the processing result is transmitted to the server.

LEGAL STATUS

[Date of request for examination] 16.11.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3543395

[Date of registration] 16.04.2004

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
